The risk factors are classified as under for the sake of better clarity and increased understanding:

INTERNAL RISKS

Business Related

1. *Political risks in International Trade*

The policy of each country varies from other country in many areas of subject which may change time to time. Each country has their own policies in various levels of relationship with other countries. In our business, the risks arise due to change in political situations in the concerned importing and exporting countries and change of laws which may severely affect import export trade.

The major factors under political risks is the change of policy of new government in each country. In most of the countries have ruling and opposition parties. When a new government is elected and the opposition party comes in to force, the policies of opposition party could be changed. These changes include import export policy and foreign business relationship with other countries.

2. *Cargo risks under Imports and Exports*

Most of our goods are transported by sea. transit risks are a common hazard for those engaged in export or import business. The list of dreary and hazardous risks in transit is long viz. Storms, collisions, theft, leakage, explosion, spoilage, fire, and high sea robbery. It is always possible to transfer the financial losses resulting from perils of sea and perils in transit to professional risk bearers known as underwriter. Principles of marine insurance are also equally applicable to insurance of air cargo.

3. *Our top 10 debtors constitute more than 79.95% of our revenue from operations for the period*

ending December 30, 2016

Our top 10 debtors Dilip Chhabria Design Pvt.Ltd, Lexux Enterprises Pvt.Ltd, Raj Chaton Industries Pvt.Ltd, Purnima Enterprises, Raj Chatons, Nakoda Impex ,A.D. Enterprises, Bhavana Jindal Exim Pvt Ltd, Priyanshi Enterprises and Abhi Enterprises (Mumbai) contribute more than 79% of our sales for the period ending December 31, 2016. Any decline in our quality standards, growing competition and any change in the demand, may adversely affect our ability to retain them. We cannot assure that we shall generate the same quantum of business, or any business at all, and the loss of business from one or more of them may adversely affect our revenues and results of operations. However, the composition and revenue generated from these customers might change as we continue to add new customers in the normal course of business. We believe that we will not face substantial challenges in maintaining our business relationship with them or finding new customers.

4. *We generally do business with our customers on purchase order basis and do not enter into long-term contracts with most of them.*

Our business is dependent on our continuing relationships with our customers. Our Company neither has any long-term contract with any of customers nor has any marketing tie up for our products. Any change in the buying pattern of our end users or disassociation of major customers can adversely affect the business of our Company. The loss of or interruption of work by, a significant customer or a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations.

5. *Ours is a High Volume-Low Margin Business*

Our Company is into the growing phase of business cycle. Our inability to regularly grow our turnover and effectively execute our key business processes could lead to lower profitability and hence adversely affect our operating results, debt service capabilities and financial conditions. Due to the nature of the products we sell, we may not be able to charge higher margins on our products. Hence, our business model is heavily reliant on our ability to effectively grow our turnover and manage our key processes including but not limited to raw material procurement, timely sales / order execution and continuous cost control of non-core activities.

For the period ended on December 31, 2016 and for the financial year 2015-16, 2014-15 , 2013-14 and 2012-13 ; our revenue was Rs. 25,779.13 lakhs, Rs. 10,815.39 lakhs, Rs. 1,707.98 lakhs , Rs. 1,270.04 lakhs and Rs 773.81 Lakhs respectively. Our Profit before Tax Margin and Profit after Tax Margin were lower than 1% for each period.

As part of our growth strategy, we have already initiated steps for increase our revenue of operations, and cater to wider markets. Our growth strategy is subject to and involves risks and difficulties, many of which are beyond our control and, accordingly, there can be no assurance that we will be able to implement our strategy or growth plans, or complete them within the timelines. Further, we operate in a dynamic industry, and on account of changes in market conditions, industry dynamics, technological improvements or changes and any other relevant factors, our growth strategy and plans may undergo changes or modifications, and such changes or modifications may be substantial, and may even include limiting or foregoing growth opportunities if the situation so demands.

For further details regarding the discussions and explanations for our past results, please refer to the chapter titled "*Management's Discussions and Analysis of Financial Condition and Results of Operations*" on page [●] of this Draft Prospectus.

6. *We have not identified any alternate source of raising the working capital mentioned as our*

'Objects of the Issue'. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.

Our Company has not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of working capital or may result in us borrowing funds on unfavourable terms, both of which scenarios may affect the business operation and financial performance of the company.

For further details of our working capital requirement, please refer chapter titled "Object for the Issue" beginning on page [●] of this Draft Prospectus.

7. *We may require additional financing for our business operations, including for our group entities, and the failure to obtain additional financing on terms commercially acceptable to us may adversely affect our ability to grow and our future profitability. Further, fluctuations in interest rates could adversely affect our results of operations.*

We may require additional capital for our business operations. The actual amount and timing of our future capital requirements may differ from estimates as a result of, among other things, unforeseen delays or cost overruns in developing our products, changes in business plans due to prevailing economic conditions, unanticipated expenses and regulatory changes. To the extent our planned expenditure requirements exceed our available resources, we will be required to seek additional debt or equity financing. Additional debt financing could increase our interest costs and require us to comply with additional restrictive covenants in our financing agreements. Additional equity financing could dilute our earnings per Equity Share and your interest in the Company, and could adversely impact our Equity Share price.

Our ability to obtain additional financing on favorable terms, if at all, will depend on a number of factors, including our future financial condition, results of operations and cash flows, the amount and terms of our existing indebtedness, security, general market conditions and market conditions for financing activities and the economic, political and other conditions in the markets where we operate.

We cannot assure you that we will be able to raise additional financing on acceptable terms in a timely manner or at all. Our failure to renew arrangements for existing funding or to obtain additional financing on acceptable terms and in a timely manner could adversely impact our capital expenditure, our business, results of operations and financial condition.

Further, an increase in the interest rates on our existing or future debt will increase the cost of servicing such debt. We have entered into certain interest rate hedging transactions in connection with such debt and we may continue to enter into interest hedging contracts or other financial arrangements in the future to minimize our exposure to interest rate fluctuations. We cannot assure you, however, that we will be able to do so on commercially reasonable terms or that any such agreements we enter into will protect us fully against our interest rate risk. Any increase in interest expense may have an adverse effect on our business prospects, financial condition and results of operations.

8. *If we fail to keep pace with the changes in the industry and market, it would result in a decline in the demand for our products, which could have an adverse effect on our business and results of operations.*

The markets in which we operate are characterized by frequent changes, particularly customer preferences, new product and product variant introductions. Consumer preferences in this market are difficult to predict and changes in those preferences or the introduction of new products by our competitors could put our products at a competitive disadvantage. Our continued success depends on our ability to anticipate, gauge and react in a timely and cost-effective manner to changes in consumer tastes for our products, especially personal wash, hair care and home care products, as well as to where and how consumers shop for those products. We must continually work to develop, produce and market new products, maintain and enhance the recognition of our brands, achieve a favourable mix of products, and refine our

approach as to how and where we market and sell our products. While we try to introduce new products or variants, we recognise that consumer tastes cannot be predicted with certainty and can change rapidly, and that there is no certainty that these will be commercially viable or effective or accepted by our customers. If we are unable to foresee or respond effectively to the changes in market conditions, there may be a decline in the demand for our products, thereby reducing our market share, which could have an adverse effect on our business and results of operations.

9. *Our Company has a negative cash flow in its operating activities, investing activities and financing activities in the past years, details of which are given below. Sustained negative cash flow could impact our growth and business.*

Our Company had negative cash flows in the previous year(s) as per the Restated Financial Statements and the same are summarized as under:

Amount (Rs. in Lakhs)

Cash-Flow from	December 31, 2016	March 31, 2016	March 31, 2015	March 31, 2014
Investing activities	(1.13)	(5.59)	2.24	(0.26)
Financing Activities	1374.50	(0.42)	(18.92)	57.06

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations.

10. *We require a number of approvals, NOCs, licences, registration and permits in the ordinary course of our business. Some of the approvals are required to be transferred in the name of JashDealmark Limited from JashDealmark Private Limited pursuant to name change of our Company and any failure or delay in obtaining the same in a timely manner may adversely affect our operations*

We require a number of approvals, NOCs, licences, registrations and permits in the ordinary course of our business. Additionally, we need to apply for renewal of approvals which expire from time to time, as and when required in the ordinary course. Also, we were a private Limited Company in the name of "JashDealmark Private Limited" as per Companies Act, 2013, a private limited company can be converted into public limited company. After complying with the relevant procedure of Companies Act, 2013, the said private limited company was converted into a public limited company in the year 2016. After conversion there was change of name of the company from "JashDealmark Private Limited" to "JashDealmark Limited" pursuant to Rule 29 of the Companies (Incorporation) Rules, 2014. We shall be taking necessary steps for transferring the pending approvals in new name of our company. In case we fail to transfer/obtain the same in name of the company same may adversely affect our business or we may not be able to carry our business

Any failure to renew the approvals that have expired, or to apply for and obtain the required approvals, licences, registrations or permits, or any suspension or revocation of any of the approvals, licences, registrations and permits that have been or may be issued to us, could result in delaying the operations of our business, which may adversely affect our business, financial condition, results of operations and prospects. Further a complete series of approvals may be and

is required to be obtained for our Company as mentioned in material licenses section of Government and Other Statutory Approvals Chapter. Additionally, our company has not applied for change of name of the approval/s mentioned in pending approvals section of Government and Other Statutory Approvals Chapter. For more information, see chapter "Government and Other Statutory Approvals" on page [●] of this Draft Prospectus.

11. ***Sale of some of our products are subject to seasonal variations and as a result, our quarterly results of operations may fluctuate.***

The sales volumes for some of our products are subject to seasonality. For example, a major portion of the sales of our liquid detergent category occurs in the third quarter of each financial year during the winter season in India and, as such, we register the maximum sales for liquid detergent during the period from November to January. The sales for our toilet soap category also experiences seasonal fluctuations where we register more toilet soap sales in the summer months as compared to the winter months. As a result of these seasonal fluctuations, our sales and results of operations for the seasonal product categories in different quarters within a single financial year vary, and the sales and results of operations may not be relied upon as indicators of the sales or results of operations of other fiscal quarters or of our future performance.

12. ***If we are unable to source business opportunities effectively, we may not achieve our financial objectives.***

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It also is possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

13. ***We operate in a highly competitive environment and may not be able to compete, which may adversely impact our business, results of operations and financial conditions.***

The industry, in which we are operating, is highly and increasingly competitive and unorganized and our results of operations and financial condition are sensitive to, and may be materially adversely affected by, competitive pricing and other factors. Competition may result in pricing pressure, reduced profit margin or lost market share or a failure to grow our market share, any of which could substantially harm our business and results of operations. There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have an adverse effect on our business, financial condition and results of operations.

14. ***Quality concerns could adversely impact our business.***

The business of our Company is dependent on the trust our customers have in the quality of our products/goods. Any goods sold by us to our customers, which do not comply with the quality specifications or standards prevalent in the business or market segment, may result in customer dissatisfaction, which may have an adverse effect on our sales and profitability.

15. ***Our ability to pay any dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirement and capital expenditures***

The amount of our future dividend payments, if any, will depend upon our Company's future earnings, financial condition, cash flows, working capital requirements, capital expenditures, applicable Indian legal restrictions and other factors. There can be no assurance that our Company will be able to pay dividends.

16. ***Our Company has not taken any insurance coverage which may protect us against certain operating hazards and from all losses and this may have an adverse impact on the financial conditions of the business.***

Our Company has not taken any insurance cover at present. Hence we may not be able to protect ourselves from any damage or loss suffered by us. To the extent that we suffer any loss or damage, the operational results of the company could be adversely affected. The company does not maintain a directors and officers liability insurance policy for the directors or key managerial personnel of the Company.

17. ***Due to the geographic concentration of our sales in the western region of India, our results of operations and financial condition are subject to fluctuations in regional economic conditions.***

A significant percentage of our total sales are made in the western regions of India. Our concentration of sales in these regions heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in these regions.

18. ***The requirements of being a listed company may strain our resources.***

We have no experience as a publicly listed company and have not been subjected to increased disclosure requirements and the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will also be subject to the provisions of the listing agreements signed with the Stock Exchanges which require us to file unaudited financial results on a quarterly basis within specified timelines. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. In addition, we may need to engage additional legal and accounting personnel with appropriate experience and technical accounting knowledge, resulting in increased costs, and we cannot assure you that we will be able to do so in a timely manner, or, at all.

19. ***There is non-compliance of Companies Act 2013 relating to opening a bank account in relation to section 42.***

Our Company has not complied with statutory and regulatory provisions of opening a bank account in relation to receipt of application money which is to be kept in separate bank account in a scheduled bank.

Such non-compliance may in the future render us liable to statutory penalties and disallowing the resolutions, which may have consequence of violation of statutory provisions

20. ***Our company has not appointed Company Secretary till date.***

Our company has not appointed Company Secretary or Compliance Officer till date. Thus, there may be chances of non-compliance.

21. ***Fraud, theft, employee negligence or similar incidents may adversely affect our results of operations and financial condition.***

Our operations may be subject to incidents of theft or damage to inventory in transit, prior to or during godown stocking and display. The industry also typically encounters some inventory loss on account of employee theft, shoplifting, vendor fraud, credit card fraud and general administrative error. Although till date we have never experienced any such instance, there can

be no assurance that we will not experience any fraud, theft, employee negligence, security lapse, loss in transit or similar incidents in the future, which could adversely affect our results of operations and financial condition.

Additionally, losses due to theft, fire, breakage or damage caused by other casualties, could adversely affect our results of operations and financial condition

22. ***Product innovation and research and development activities are an integral part of our business model. If our research and product development efforts are not successful or if we are not able to attract and retain skilled scientists, our business may suffer.***

Growth of our future operations depends upon our ability to successfully carry out research and development of new processes and produce new and higher quality products. These processes must meet regulatory standards where applicable and may require regulatory approvals. The development and commercialization process would require spending of both time and money. Our ongoing investments in research and development for new products and processes may result in higher costs without a proportionate increase in revenues. Delays in any part of the process, our inability to obtain necessary regulatory approvals for our products or failure of a product to be successful at any stage could harm our business.

Our ability to successfully carry out research and development depends on our ability to attract and retain skilled scientists. Our failure to attract and retain skilled manpower could adversely affect our growth strategy. While we believe we have a strong technical and production team, we may not be able to continuously attract or retain such personnel, or retain them on acceptable terms, given the demand for such personnel among competitors, universities and non-profit research institutions. Our failure to attract and retain skilled personnel could have an adverse impact on our growth.

23. ***Our success depends heavily on our Promoters and Key Management Personnel for the continued success of our business through their continuing services and strategic guidance and support***

Our success heavily depends upon the continued services of our Key Management Personnel, along with support of our Promoters. The loss of our Promoter or any of our Key Management Personnel, or failure to recruit suitable or comparable replacements, could have an adverse effect on us. The loss of them could seriously impair the ability to continue to manage and expand the business efficiently. We may also have to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting skilled employees that our business requires, which may have adverse effect on our cash flows. If we are unable to retain qualified employees at a reasonable cost, we may be unable to execute our growth strategy. For further details of our key managerial personnel, please refer to Section "Our Management" on page [●] of this Draft Prospectus.

24. ***Our Promoter and Directors have interest in our Company, other than reimbursement of expenses incurred or remuneration.***

Our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may not be able to affect the outcome of such voting. Our Promoters are interested in the transactions entered into our Company and our Group Entities or Promoter Group. Our Group Entities namely, Top Most are engaged in the similar line of business of exim, as of our Company. Further, we have not entered into any non-compete agreement with any of said entities. We cannot assure that our Promoters who have common interest in said entities will not favour the interest of the said entities. As a result, conflicts of interests may arise in allocating business opportunities circumstances where our respective interests conflict. In cases of conflict, our Promoters may favour their companies in which our Promoters have interest. There can be no assurance that our Promoters or our Group Companies or members of the Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition which may adversely affect our profitability and results of operations. 28. *We face competition in our business from organized and unorganized players, which may adversely affect our business operation and financial condition.*

The market for our industry is competitive on account of both the organized and unorganized players. Some of our competitors may have longer industry experience and greater financial, technical and other resources such as stronger capabilities. Moreover, the unorganized sector offers their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

29. *The average cost of acquisition of Equity Shares by our Promoters could be lower than the Issue Price.*

Our Promoters average cost of acquisition of Equity Shares in our Company is lower than the Issue Price decided by the Company in consultation with the Lead Manager. 30. *Our profitability will suffer if we are not able to maintain our asset usage levels and pricing and control our costs.*

Our profit margin, and therefore our profitability, is largely a function of our asset usage and the rates we are able to recover for our services. If we are not able to maintain the pricing for our services or appropriate asset usage, without corresponding cost reductions, our profitability will suffer. Our profitability is also a function of our ability to control our costs and improve our efficiency. As we increase the number of our employees and execute our strategies for growth, we may not be able to manage a significantly larger and more geographically diverse workforce, which could adversely affect our ability to control our costs or improve our efficiency. Similarly, any change in the mix of income from services could also impact our results, as certain of our services have much higher margins than others.

31. *There is no guarantee that our Equity Shares will be listed on the Stock Exchanges in a timely manner or at all.*

In accordance with Indian law and practice, permission to list the Equity Shares will not be granted until after the Equity Shares have been issued and allotted. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

32. *Insufficient cash flows to meet required payments on our debts and working capital requirements could adversely affect our Company's operations and financial results*

The business of our Company requires a significant amount of working capital to finance the payments for Man-power, day to day Expenses and term loans for establishment of office facilities and acquisition of equipments/vehicles. The working capital requirements of our Company are also affected by the credit lines that our Company extends to its customers, in line with industry practice. Moreover, our Company may need to raise further term loans and working capital loans in the future to meet its capital expenditure and to satisfy its working capital requirements. There can be no assurance that our Company will continue to be successful

in arranging adequate working capital and term loans for its existing or expanded operations on acceptable terms or at all, which could adversely affect our Company's operations and financial results.

33. ***Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.***

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

The fund requirement and deployment mentioned in the Objects of the Issue have not been appraised by any bank or financial institution.***

We intend to deploy the Net Issue Proceeds in FY 2016 - 2017 and such deployment is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the fresh Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc. For further details on the use of the Issue Proceeds, please refer chapter titled "Objects of the Issue" beginning on page [●] of this Draft Prospectus.

The deployment of funds for the purposes described above is at the discretion of our Company's Board of Directors. The fund requirement and deployment is based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in the chapter titled "Objects of the Issue" beginning on page [●] of this Draft Prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Issue. Our Board of Directors will monitor the utilization of the proceeds of this Issue. However, in accordance with Section 27 of the Companies Act, 2013, a company shall not vary the objects of the Issue without our Company being authorised to do so by our shareholders by way of special resolution and other compliances in this regard.

35. ***Our Promoters will continue to retain majority shareholding in us after this Issue, which will allow them to exercise significant influence over us.***

The majority of our issued and outstanding Equity Shares are currently beneficially owned by our Promoters. Upon completion of this Issue, our Promoters will own 73.64% of our post-Issue Equity Share capital. Accordingly, our Promoters will continue to exercise significant influence over our business policies and affairs and all matters requiring shareholders' approval, including the composition of our Board of Directors, the adoption of amendments to our certificate of incorporation, the approval of mergers, strategic acquisitions or joint ventures or the sales of substantially all of our assets, and the policies for dividends, lending, investments and capital expenditures. This concentration of ownership also may delay, defer or even prevent a change in control of our Company and may make some transactions more difficult or impossible without the support of these shareholders. The interests of the Promoters as our controlling shareholders could conflict with our interests or the interests of our other shareholders.

36. ***Our trademark  is not registered under the Trade Marks Act and our ability to use the trademark may be impaired***

Our Company's business may be affected due to our inability to protect our existing and future intellectual property rights. Currently, we do not have a registered trademark over our name and logo under the Trade Marks Act and consequently do not enjoy the statutory protections

accorded to a trademark registered in India and cannot prohibit the use of such logo by anybody by means of statutory protection. If our trademark is not registered it can allow any person to use a deceptively similar mark and market its product which could be similar to the products offered by us. Such infringement will hamper our business as prospective clients may go to such user of mark and our revenues may decrease.

37. *Our Promoters have provided personal sureties to loan facilities availed by us, which if revoked may require alternative sureties, repayment of amounts due or termination of the facilities.*

Our Promoters have provided personal sureties in relation to loan facilities availed of by us. In the event that any of these guarantees are revoked, the lenders for such facilities may require alternate sureties, repayment of amounts outstanding under such facilities, or may even terminate such facilities. We may not be successful in procuring alternative sureties satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which may not be available on acceptable terms or at all and any such failure to raise additional capital could affect our operations and our financial condition.

38. *Our future funds requirements, in the form of fresh issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

39. *Our Promoters and members of the Promoter Group will continue jointly to retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.*

After completion of the Issue, our Promoters and Promoter Group will collectively own 72.92 % of the Equity Shares. As a result, our Promoters together with the members of the Promoter Group will be able to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

40. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.*

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and cause serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

41. *Some of the KMPs is associated with our company or less than one year.*

Key Management Personnel i.e Chief Financial Officer is associated with the Company for a period of less than one year. For details of Key Management Personnel and their appointment, please refer to chapter "Our Management" beginning on page [●] of this Draft Prospectus

Issue Related

42. *After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop*

The price of the Equity Shares on the Stock Exchanges may fluctuate as a result of the factors, including:

- a. Volatility in the Indian and global capital market;
- b. Company's results of operations and financial performance;
- c. Performance of Company's competitors;
- d. Adverse media reports on Company or pertaining to the Industry in which we operate;
- e. Changes in our estimates of performance or recommendations by financial analysts;
- f. Significant developments in India's economic and fiscal policies; and
- g. Significant developments in India's environmental regulations

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There has been no public market for the Equity Shares and the prices of the Equity Shares may fluctuate after this Issue. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

43. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price*

The Issue Price of our Equity Shares has been determined by fixed price method. This price is based on numerous factors (For further information, please refer chapter titled "Basis for Issue Price" beginning on page [●] of this Draft Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts; Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance

44. *You will not be able to sell immediately on Stock Exchange any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions*

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. We cannot assure you that the Equity Shares will be credited to investor's demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in the Draft Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the Companies Act, 2013, in the event that the permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

45. *Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares*

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur

46. *There are restrictions on daily / weekly / monthly movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time*

Once listed, we would be subject to circuit breakers imposed by all stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time

EXTERNAL RISKS

Industry Risks

47. *Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations*

Our business and industry is regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations

48. *Civil unrest, acts of violence including terrorism or war involving India and other countries could materially and adversely affect the financial markets and our business.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Terrorist attacks and other acts of violence may adversely affect the Indian stock markets, where our Equity Shares will trade, and the global equity markets generally.

49. *The retail sector is subject to extensive foreign exchange regulations.*

The retail sector in India is regulated by the GoI, State Governments and local authorities. Further, investments made by non-residents into India are governed by the Foreign Exchange Management Act, 1999 and the rules and regulations thereunder and the Consolidated Foreign

Direct Investment Policy issued by the Department of Industrial Policy and Promotion effective from April 10, 2012 ("**FDI Policy**"). According to recent notifications issued by the Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, GoI, foreign direct investment (**FDI**) has now been permitted in the Indian multi-brand retail trading industry up to a maximum of 51.0%, with prior Governmental approval and subject to the satisfaction of certain conditions. Further, under the FDI Policy, FDI in the Indian single-brand retail is permitted up to 100% of such company's paid-up share capital, with prior Governmental approval, subject to the satisfaction of certain conditions. International jewellery retailers, with greater resources and brand recognition, may now consider establishing stores in India. This may have an adverse impact on our business, results of operations and financial condition.

Furthermore, we are subject to exchange controls that regulate borrowing in foreign currencies. Such regulatory restrictions limit our financing sources and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. Limitations on debt in foreign currencies may have an adverse effect on our business growth, financial condition and results of operations.

50. *There could be political, economic or other factors that are beyond our control but may have a material adverse impact on our business and results of operations should they materialize.*

The following external risks may have a material adverse impact on our business and results of operations should any of them materialize:

- Political instability, a change in the Government or a change in the economic and deregulation policies or a change in taxation policies and regulations could adversely affect economic conditions in India in general and our business in particular;
- A slowdown in economic growth in India could adversely affect our business and results of operations. The growth of our business and our performance is linked to the performance of the overall Indian economy. We are also impacted by consumer spending levels and businesses such as ours would be particularly affected should Indian consumers in our target segment have reduced access to disposable income;
- Civil unrest, acts of violence, terrorist attacks, regional conflicts or situations or war involving India or other countries could materially and adversely affect the financial markets which could impact our business. Such incidents could impact economic growth or create a perception that investment in Indian companies involves a higher degree of risk which could reduce the value of the Equity Shares;
- Natural disasters in India may disrupt or adversely affect the Indian economy, the health of which our business depends on;
- Any downgrading of India's sovereign rating by international credit rating agencies may negatively impact our business and access to capital. In such event, our ability to grow our business and operate profitably would be severely constrained;
- Instances of corruption in India have the potential to discourage investors and derail the growth prospects of the Indian economy. Corruption creates economic and regulatory uncertainty and could have an adverse effect on our business, profitability and results of operations; and
- The Indian economy has had sustained periods of high inflation. Should inflation continue to increase sharply, our profitability and results of operations may be adversely impacted. High rates of inflation in India could increase our employee costs, decrease the disposable income available to our customers and decrease our operating margins, which could have an adverse effect on our profitability and results of operations.

51. *The proposed adoption of IFRS could result in our financial condition and results of operations appearing materially different than under Indian GAAP.*

Public companies in India, including us, may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for the adoption of, and

convergence with, IFRS announced by the Ministry of Corporate Affairs, GoI (–MCAI), through a press note dated January 22, 2010. The MCA through a press release dated February 25, 2011, announced that it will implement the converged accounting standards in a phased manner after various issues including tax-related issues are resolved. The MCA is expected to announce the date of implementation of the converged accounting standards at a later date. Our financial condition, results of operations, cash flows or changes in shareholders equity may appear materially different under IFRS than under Indian GAAP. This may have a material adverse effect on the amount of income recognized during that period and in the corresponding period in the comparative fiscal year/period. In addition, in our transition to IFRS reporting, we may encounter difficulties in the ongoing process of implementing and enhancing our management information systems. Moreover, our transition may be hampered by increasing competition and increased costs for the relatively small number of IFRS-experienced accounting personnel available as more Indian companies begin to prepare IFRS financial statements.

52. *We cannot guarantee the accuracy of facts and other statistics with respect to India, the Indian economy and the Indian Fmcg sector contained in this Draft Prospectus.*

Facts and other statistics in this Prospectus relating to India, the Indian economy and the Indian fmcg industry have been derived from various publications that we believe to be reliable. However, we cannot guarantee the quality or reliability of such source of materials. While we have taken reasonable care in the reproduction of the information, the same has not been prepared or independently verified by us, the LMs, or any of our or their respective affiliates or advisers and, therefore, we make no representation as to the accuracy of such facts and statistics, which may not be consistent with other information compiled within or outside India. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. In all cases, investors should give consideration as to how much weight or importance they should attach to or place on such facts or statistics.

53. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if the securities transaction tax (“STT”) has been paid on the transaction. The STT will be levied on and collected by an Indian stock exchange on which equity shares are sold. Any gain realised on the sale of shares held for more than 12 months to an Indian resident, which are sold other than on a recognised stock exchange and as a result of which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realised on the sale of shares held for a period of 12 months or less will be subject to capital gains tax in India. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less which are sold other

54. *Economic developments and volatility in securities markets in other countries may cause the price of the Equity Shares to decline.*

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investor's reactions to developments in one country may have adverse effects on the market price of securities of companies situated in other countries, including India. For instance, the recent financial crisis in the United States and European countries led to a global financial and economic crisis that adversely affected the market prices in the securities markets around the world, including Indian securities markets.

Negative economic developments, such as rising fiscal or trade deficits, or a default on national debt, in other emerging market countries may affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general. The Indian stock exchanges have experienced temporary exchange closures, broker defaults, settlement delays and strikes by brokerage firm employees. In addition, the governing bodies of the Indian stock exchanges have from time to time imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Furthermore, from time to time, disputes have occurred between listed companies and stock exchanges and other regulatory bodies, which in some cases may have had a negative effect on market sentiment.

55. *Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

Other Risks

56. *The Companies Act, 2013 has effected significant changes to the existing Indian company law framework, which may subject us to higher compliance requirements and increase our compliance costs*

A majority of the provisions and rules under the Companies Act, 2013 have recently been notified and have come into effect from the date of their respective notification, resulting in the corresponding provisions of the Companies Act, 1956 ceasing to have effect. The Companies Act, 2013 has brought into effect significant changes to the Indian company law framework, such as in the provisions related to issue of capital, disclosures in prospectus, corporate governance norms, audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and key managerial personnel from engaging in forward dealing. To ensure compliance with the requirements of the Companies Act, 2013, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention.

The Companies Act, 2013 introduced certain additional requirements which do not have corresponding equivalents under the Companies Act, 1956. Accordingly, we may face challenges in interpreting and complying with such provisions due to limited jurisprudence on them. In the event, our interpretation of such provisions of the Companies Act, 2013 differs from, or contradicts with, any judicial pronouncements or clarifications issued by the Government in the future, we may face regulatory actions or we may be required to undertake remedial steps. We may face difficulties in complying with any such overlapping requirements. Further, we cannot currently determine the impact of provisions of the Companies Act, 2013 which are yet to come in force. Any increase in our compliance requirements or in our compliance costs may have an adverse effect on our business and results of operations.

57. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares*

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realised on the sale of shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if the securities transaction tax ("STT") has been paid on the transaction. The STT will be levied on and

collected by an Indian stock exchange on which equity shares are sold. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India, if securities transaction tax has been paid on the transaction. Any gain realised on the sale of shares held for more than 36 months to an Indian resident, which are sold other than on a recognised stock exchange and as a result of which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realised on the sale of equity shares held for a period of 36 months or less which are sold other than on a recognised stock exchange and on which no STT has been paid, may be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India

58. *Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements prepared and presented in accordance with SEBI ICDR Regulations contained in this Draft Prospectus*

As stated in the reports of the Peer Reviewed Auditor included in this Draft Prospectus under chapter "Financial Statements as restated" beginning on page [●], the financial statements included in this Draft Prospectus are based on financial information that is based on the audited financial statements that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given in this Draft Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Draft Prospectus. Accordingly, the degree to which the financial information included in this Draft Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Draft Prospectus should accordingly be limited.

59. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations*

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include:

- custom duties on imports of raw materials and components;
- central and state sales tax, value added tax and other levies; and
- Other new or special taxes and surcharges introduced on a permanent or temporary basis from time to time.

These taxes and levies affect the cost and prices of our products and therefore demand for our product. An increase in any of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability and financial condition

60. *The nationalized goods and services tax (GST) regimes proposed by the Government of India may have material impact on our operations*

The Government of India has proposed a comprehensive national goods and service tax (GST) regime that will combine taxes and levies by the Central and State Governments into a unified rate structure. Given the limited liability of information in the public domain covering the GST we are unable to provide/ measure the impact this tax regime may have on our operations

61. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in*

particular

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular

62. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and trading industry contained in the Draft Prospectus*

While facts and other statistics in the Draft Prospectus relating to India, the Indian economy and the transformers, cables and wire industry has been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled "Our Industry" beginning on page [•] of the Draft Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere

63. *Conditions in the Indian securities market may affect the price or liquidity of our Equity Shares*

The Indian securities markets are smaller than securities markets in more developed economies and the regulation and monitoring of Indian securities markets and the activities of investors, brokers and other participants differ, in some cases significantly, from those in the more developed economies. Indian stock exchanges have in the past experienced substantial fluctuations in the prices of listed securities. Further, the Indian stock exchanges have experienced volatility in the recent times. The Indian stock exchanges have also experienced problems that have affected the market price and liquidity of the securities of Indian companies, such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading and limited price movements. A closure of, or trading stoppage on the SME Platform of BSE could adversely affect the trading price of the Equity Shares

64. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic, social and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices

65. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection / tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all

66. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition

67. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares

68. *Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer*

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares

Global Economic Environment

Since the Economic Survey and Budget were presented a year ago, the Indian economy has continued to consolidate the gains achieved in restoring macroeconomic stability. Inflation, the fiscal deficit, and the current account deficit have all declined, rendering India a relative haven of macro stability in these turbulent times. Economic growth appears to be recovering, albeit at varying speeds across sectors. 1.22 At the same time, the upcoming Budget and 2016-17 (FY2017) economic policy more broadly, will have to contend with an unusually challenging and weak external environment. Although the major international institutions are yet again predicting that global growth will increase from its current subdued level, they assess that risks remain tilted to the downside. This uncertain and fragile outlook will complicate the task of economic management for India. 1.23 The risks merit serious attention not least because major financial crises seem to be occurring more frequently. The Latin American debt crisis of 1982, the Asian Financial crisis of the late 1990s, and the Eastern European crisis of 2008 suggested that crises might be occurring once a decade. But then the rapid succession of crises, starting with Global Financial Crisis of 2008 event would require Indian monetary and fiscal policy not to add to the deflationary impulses from abroad. The consolation and proceeding to the prolonged European crisis, the mini-crises of 2013, and the China provoked turbulence in 2015 all hinted that the intervals between events are becoming shorter. 1.24 This hypothesis could be validated in the immediate future, since identifiable vulnerabilities exist in at least three large emerging economies—China, Brazil, Saudi Arabia—at a time when underlying growth and productivity developments in the advanced economies are soft. More flexible exchange rates, however, could moderate full-blown eruptions into less disruptive but more prolonged volatility. 1.25 One tail risk scenario that India must plan for is a major currency re-adjustment in Asia in the wake of a similar adjustment in China, as such an event would spread deflation around the world. Another tail risk scenario could unfold as a consequence of policy actions—say, capital controls taken to respond to curb outflows from large emerging market countries, which would further moderate the growth impulses emanating from them. 1.26 In either case, foreign demand is likely to be weak, forcing India—in the short run—to find and activate domestic sources of demand to prevent the growth momentum from weakening. At the very least, a tail risk would be that weaker oil and commodity prices would help keep inflation and the twin deficits in check.

The global economic growth eased to 3.2% in 2015 from 3.4% in 2014, with similar trend expected to persist in 2016 followed by modest improvement in 2017. (Source: IMF Report) Specifically, the rate of expansion of economic activity in China, the Euro Area, the United States and the United Kingdom is expected to moderate in 2016 relative to the previous year, whereas the rate in India, the ASEAN-5 countries and Japan is expected to remain steady. The Indian Economy

According to World Bank, India has retained its position as the fastest-growing economy in the world in 2015, after overtaking China and will continue to occupy the top slot with a growth rate of approximately 7-8% for the next 3-4 years. India's growth rate is significantly higher than the world average of around 3% and India ranks ahead of other developing economies, such as China, Brazil, South Africa and Indonesia. The ongoing liberalisation of India's FDI regime has led to a surge in investments and the FDI inflow has doubled in fiscal 2016. Reduced macro-economic vulnerability, coupled with increased investment in infrastructure has enhanced India's Global Competitive Index or GCI ranking to 55 in fiscal 2016 from 71 in fiscal 2015.

INDIAN TRADING INDUSTRY

Introduction

The Prime Minister of India, Mr Narendra Modi, has launched the ‘Make in India’ initiative to place India on the world map as a manufacturing hub and give global recognition to the Indian economy.

The Government of India has set an ambitious target of increasing the contribution of manufacturing output to 25 per cent of Gross Domestic Product (GDP) by 2025, from 16 per cent currently.

Market Size

India’s manufacturing sector could touch US\$ 1 trillion by 2025. There is potential for the sector to account for 25-30 per cent of the country’s GDP and create up to 90 million domestic jobs by 2025.

Business conditions in the Indian manufacturing sector continue to remain positive.

In November 2015, the seasonally adjusted Nikkei India Manufacturing Purchasing Managers' Index (PMI) stood at 50.3, which indicated expansion for twenty-fifth consecutive month. The services PMI was at 50.1 points in November 2015.

- urban planning, among other events.
- The National Institution for Transforming India Aayog (NITI Aayog) plans to release a blueprint for various technological interventions which need to be incorporated by the Indian manufacturing economy, with a view to have a sustainable edge over competing neighbours like Bangladesh and Vietnam over the long term.
 - Ms Nirmala Sitharaman, Minister of State (Independent Charge) for Commerce and Industry, has launched the Technology Acquisition and Development Fund (TADF) under the National Manufacturing Policy (NMP) to facilitate acquisition of Clean, Green and Energy Efficient Technologies, by Micro, Small & Medium Enterprises (MSMEs).
 - The Government of India has asked New Delhi's envoys in over 160 countries to focus on economic diplomacy to help government attract investment and transform the 'Make in India' campaign a success to boost growth during the annual heads of mission's conference. Prime Minister, Mr Modi has also utilised the opportunity to brief New Delhi's envoys about the Government's Foreign Policy priority and immediate focus on restoring confidence of foreign investors and augmenting foreign capital inflow to increase growth in manufacturing sector.

Overview of FMCG Industry Executive Summary

Overview of Plastic Industry

Introduction

The Indian plastics industry made a promising beginning in 1957 with the production of polystyrene. Thereafter, significant progress has been made, and the industry has grown and diversified rapidly. The industry spans the country and hosts more than 2,000 exporters. It employs about 4 million people and comprises more than 30,000 processing units, 85-90 percent of which are small and medium-sized enterprises.

- Export of plastic products from India stood at US\$ 7.64 billion in FY 2015-16.
- During 2015-16, major importers of Indian plastic products were US (US\$ 898.45 million), China (US\$ 489.25 million), UAE (US\$ 422.74 million), Germany (US\$ 290.03 million), UK (US\$ 287.68 million), Italy (US\$ 286.9 million), Turkey (US\$ 285.23 million), Bangladesh (US\$ 184.33 million), Saudi Arabia (US\$ 169.1 million) and Nepal (US\$ 161.09 million)
- Domestic consumption of plastic is expected to touch 20 million Metric Tonnes by 2020.
- The Indian plastics industry produces and exports a wide range of raw materials, plastic-moulded extruded goods, polyester films, moulded / soft luggage items, writing instruments, plastic woven sacks and bags, polyvinyl chloride (PVC), leather cloth and sheeting, packaging, consumer goods, sanitary fittings, electrical accessories, laboratory / medical surgical ware, tarpaulins, laminates, fishnets, travelware, and others.
- The Indian plastics industry offers excellent potential in terms of capacity, infrastructure and skilled manpower. It is supported by a large number of polymer producers, and plastic process machinery and mould manufacturers in the country.
- Among the industry's major strengths is the availability of raw materials in the country. Thus, plastic processors do not have to depend on imports. These raw materials, including polypropylene, high-density polyethylene, low-density polyethylene and PVC, are manufactured domestically.

PLASTICS EXPORT PROMOTION COUNCIL

The Plastics Export Promotion Council (PLEXCONCIL) is the apex government body responsible for the promotion of plastic exports. PLEXCONCIL members comprise large-/medium-/small-scale manufacturers and exporters. The council supports exporters by participating in international trade fairs, exploring new markets, organising buyer- seller meets both in India and overseas, and engaging in various other promotion and need- based activities.

Total export of plastic products stood at US\$ 7.64 billion in FY 2015-16

Indian Plastic Industry

Plastics is one of the fastest growing industries in India. Products made out of various types of plastics play an indispensable role in a number of industries such as agriculture, packaging, construction, consumer and institutional products, power, furniture and furnishings, electrical and electronic components, telecommunication, and others. The following table illustrates some of the common uses of plastics in industries:

Industry	Application
Agriculture	Crates, irrigation pipes, tubes, greenhouses
Power	Insulation wires, switches, plugs
Automobiles	Vehicle body parts such as fenders, body panels, etc
Construction	Doors, windows, frames, railings, floorings, sidings, beams, bricks
Pharmaceuticals	Petri-dishes, beakers, bottles, optical lenses, dentistry, etc.
Consumer Products	Tables, chairs, cabinets, bins, mats, vessels, utensils, etc
Industrial Products	Paints, tools, items of machinery, etc.
Packaging	Pouches, barrels, bottles, bags, boxes, crates
Telecommunication	Cables, handsets, shelters, etc.
Hospitality	Cutlery, tools, sanitaryware, toiletries
Textiles	Synthetic fabrics, yarns, fibres, etc.

There are four key techniques for manufacturing plastic products: extrusion, injection moulding, rotomoulding and blow moulding. The following table lays down an illustrative list of products that can be manufactured using the each of said processes

Plastic Products	Extrusion	Films, sheets, fibre & filaments, pipes, conduits & profiles, miscellaneous applications
	Injection moulding	Furniture, mates, industrial products such as crates, pallets, etc.;
	Blow moulding	Bottles, containers, toys & houseware
	Rotomoulding	Large circular tanks such as water tanks

Plastics can be broadly divided into thermosetting plastics and thermoplastics. Thermosetting plastics are those that cannot be softened again, once having been exposed to heat and pressure. Thermosets are hard and durable, and are mainly used for auto parts, aircraft parts and tires. Examples include polyurethanes, polyesters, epoxy resins and phenolic resins. Thermoplastics on the other hand are those which soften and melt if enough heat is applied; examples are polyethylene (PE), polypropylene (PP), polystyrene (PS), polyvinyl chloride (PVC) and polytetrafluoroethylene (PTFE)

Global Economic Environment

Since the Economic Survey and Budget were presented a year ago, the Indian economy has continued to consolidate the gains achieved in restoring macroeconomic stability. Inflation, the fiscal deficit, and the current account deficit have all declined, rendering India a relative haven of macro stability in these turbulent times. Economic growth appears to be recovering, albeit at varying speeds across sectors. 1.22 At the same time, the upcoming Budget and 2016-17 (FY2017) economic policy more broadly, will have to contend with an unusually challenging and weak external environment. Although the major international institutions are yet again predicting that global growth will increase from its current subdued level, they assess that risks remain tilted to the downside. This uncertain and fragile outlook will complicate the task of economic management for India. 1.23 The risks merit serious attention not least because major financial crises seem to be occurring more frequently. The Latin American debt crisis of 1982, the Asian Financial crisis of the late 1990s, and the Eastern European crisis of 2008 suggested that crises might be occurring once a decade. But then the rapid succession of crises, starting with Global Financial Crisis of 2008 event would require Indian monetary and fiscal policy not to add to the deflationary impulses from abroad. The consolation and proceeding to the prolonged European crisis, the mini-crises of 2013, and the China provoked turbulence in 2015 all hinted that the intervals between events are becoming shorter. 1.24 This hypothesis could be validated in the immediate future, since identifiable vulnerabilities exist in at least three large emerging economies—China, Brazil, Saudi Arabia—at a time when underlying growth and productivity developments in the advanced economies are soft. More flexible exchange rates, however, could moderate full-blown eruptions into less disruptive but more prolonged volatility. 1.25 One tail risk scenario that India must plan for is a major currency re-adjustment in Asia in the wake of a similar adjustment in China, as such an event would spread deflation around the world. Another tail risk scenario could unfold as a consequence of policy actions—say, capital controls taken to respond to curb outflows from large emerging market countries, which would further moderate the growth impulses emanating from them. 1.26 In either case, foreign demand is likely to be weak, forcing India—in the short run—to find and activate domestic sources of demand to prevent the growth momentum from weakening. At the very least, a tail risk would be that weaker oil and commodity prices would help keep inflation and the twin deficits in check.

Global Economic Overview

The global macroeconomic landscape is currently charting a rough and uncertain terrain characterized by weak growth of world output. The situation has been exacerbated by; (i) declining prices of a number of commodities, with reduction in crude oil prices being the most visible of them, (ii) turbulent financial markets (more so equity markets), and (iii) volatile exchange rates. These conditions reflect extreme risk-aversion behavior of global investors, thus putting many, and in particular, commodities exporting economies under considerable stress.

One important positive outcome in 2015 is the modest pickup in the growth of some of the advanced economies. However, growth in emerging market and developing economies declined for the fifth consecutive year. As a result, overall global economic activity remained subdued in 2015. In its latest Update of the World Economic Outlook (WEO), published on 19 January 2016, the IMF projected growth in the global economy to improve from 3.1 per cent in 2015, to 3.4

per cent in 2016 and further to 3.6 per cent in 2017. Growth in advanced economies is projected at 2.1 per cent in 2016 and to continue through 2017 at the same rate

The slowdown and rebalancing of the Chinese economy, lower commodity prices, and strains in some large Emerging Market and Developing economies (EMDE) are likely to continue to weigh on their growth prospects in 2016–17. Assessments indicate that mixed inflation developments in the EMDEs reflect the conflicting implications of weak domestic demand and lower commodity prices versus marked currency depreciations over the past year. The WEO Update also indicated that India and the rest of emerging Asia are bright spots, with some other countries facing strong headwinds from China's economic rebalancing and global manufacturing weakness. World trade volume growth projections have been placed at 2.6 per cent and 3.4 per cent respectively for 2015 and 2016, which is much lower than what was estimated earlier in WEO in October 2015.

Global Outlook For growth

One important positive outcome in 2015 was the modest pick-up in growth in some of the advanced economies. It might be recalled that after falling in 2009 due to the 2008 global financial crisis, growth in emerging and developing economies rebounded in 2010 and 2011. While advanced economies also exhibited a recovery in 2010 thanks to the large stimuli, global growth continued to be tepid relative to the average of the decade ending 2006, largely on account of the slowdown in advanced economies. Spillover effects of the crisis may have been large, prolonged and bi-directional, given that the global integration is far greater than in the prior decade. This has made the task of projecting global economic outlook arduous. This uncertainty has led to the International Monetary Fund (IMF) revising the global growth outlook in its World Economic Outlook (WEO) four times a year since 2009.

In its latest WEO Update, published on 19 January 2016, the IMF has projected growth in the global economy to go up from 3.1 per cent in 2015 to 3.4 per cent in 2016 and further to 3.6 per cent in 2017, slightly lower than the projection published in October 2015. Growth in advanced economies is revised by 0.2 percentage points in 2016 to 2.1 per cent, to continue through 2017. Growth in the US is expected to remain resilient owing to strengthening of the housing and labour markets. Growth in Japan is also expected to consolidate in 2016, on the back of fiscal support, lower oil prices, accommodative financial conditions, and rising incomes.

Overall global economic activity remained subdued in 2015, as growth in emerging market and developing economies (EMDE) declined for the fifth consecutive year and recovery in advanced economies was modest. This is also attributable to the changing composition of the global economy and relative point contributions to global growth. The fall in the contribution of the EMDEs is not being made good by the advanced economies. A recent feature is that the Chinese economy is gradually slowing down and is transitioning from investment demand to consumption demand and from manufacturing to services. The concern over the spillovers of subdued global growth to other economies through trade channels and weaker commodity prices is manifest in diminishing confidence and increasing volatility in financial markets. In addition, a dual monetary policy—a gradual tightening in monetary policy in the US in the backdrop of its resilient recovery and easy monetary policy in several other major advanced economies—has led to continued uncertainties and poses challenges for the year ahead. In the case of EMDEs, growth remained subdued at 4 per cent in 2015, but is projected to increase to 4.3 per cent in 2016 and 4.7 per cent in 2017. The slowdown and rebalancing of the Chinese economy, lower commodity prices, and strains in some large emerging market economies will continue to weigh on growth prospects in 2016–17. Assessments indicate that mixed inflation developments in EMDEs reflect the conflicting implications of weak domestic demand and lower commodity prices versus marked currency depreciations over the past years.

The 19 January WEO Update also indicated that India and the rest of emerging Asia are bright spots, albeit with some countries facing strong headwinds from China's economic rebalancing and global manufacturing weakness. The IMF's growth forecast for India is 7.5 per cent in 2016 and 2017 and this surpasses the projection of 6.3 per cent and 6.0 per cent

respectively for China. The level of global economic activity has a significant and direct bearing on the growth prospects of the emerging economies through trade channels. As per the Update, world trade volume growth projections have been placed at 3.4 per cent and 4.1 per cent respectively for 2016 and 2017—lower by 0.7 percentage points to 0.5 percentage point respectively from WEO, October 2015. The World Bank’s Report on Global Economic Prospects (January 2016) also estimated that India will grow by a robust 7.8 per cent in 2016 and 7.9 per cent in the following two years. Compared to other major developing countries, the report maintained that India is well positioned to withstand near-term headwinds and volatility in global financial markets due to reduced external vulnerabilities, a strengthening domestic business cycle, and a supportive policy environment

Global Growth Trend

The global economic growth eased to 3.2% in 2015 from 3.4% in 2014, with similar trend expected to persist in 2016 followed by modest improvement in 2017. (Source: IMF Report) Specifically, the rate of expansion of economic activity in China, the Euro Area, the United States and the United Kingdom is expected to moderate in 2016 relative to the previous year, whereas the rate in India, the ASEAN-5 countries and Japan is expected to remain steady. The Indian Economy

According to World Bank, India has retained its position as the fastest-growing economy in the world in 2015, after overtaking China and will continue to occupy the top slot with a growth rate of approximately 7-8% for the next 3-4 years. India’s growth rate is significantly higher than the world average of around 3% and India ranks ahead of other developing economies, such as China, Brazil, South Africa and Indonesia. The ongoing liberalisation of India’s FDI regime has led to a surge in investments and the FDI inflow has doubled in fiscal 2016. Reduced macro-economic vulnerability, coupled with increased investment in infrastructure has enhanced India’s Global Competitive Index or GCI ranking to 55 in fiscal 2016 from 71 in fiscal 2015.

With a population of over 1.3 billion and an estimated GDP of Rs 122.7 trillion in fiscal 2016, the Indian economy is the third largest economy adjusted for purchasing power parity or PPP and has favorable demographics with the largest working population, with 52.4% of the working population in the age group of 15-64 years. It is projected that the Indian domestic market will support India's growth in spite of the global economic slowdown. Fiscal consolidation and government initiatives have helped keep inflation under check and benefited the economy by bringing down the cost of borrowing for both the government and private sector. It is expected that consumer price inflation or CPI, will stay soft at 5%. With these fundamental factors expected to trend in the right direction, the long term potential of India is expected to be healthy.

However to ensure lasting growth further reforms are needed, especially with regard to the following:

- Ease of doing business to ensure faster decision making and ensure administrative efficiency.
- Passing of key bills, like the recently passed Insolvency and Bankruptcy Code Bill, 2016, which strives to create an enabling environment for expeditious resolution of bankruptcies, the Aadhar Bill to distribute subsidies, rural wages and pensions through an electronic platform and GST to herald transparency, reduce the cascading effect of taxes and translate to higher GDP growth.
- Boost infrastructure by encouraging higher FDI investments in railways and constructions. Huge capacity augmentation plans have been laid out in the power transmission and distribution infrastructure in order to improve electricity access.
- Boosting the manufacturing sector in India through the Skilling India and Make in India schemes.
- Inflation: Keeping inflation and cost of borrowings in check to support consumption growth.
- Development of the financial market, especially the bond market.
- Enhance digitalization by improving the online infrastructure in India.

- *Ensure low reliance on excessive leverage:* India's GDP growth is not supported by excessive credit creation, averaging 10.2% in fiscals 2015 and 2016 compared with 9.8% nominal GDP growth.

Amid these reforms, India's economic growth is picking up, albeit at a slow pace, after having dropped below 6% in fiscal 2013. Structural reforms take time to impact the economy and improvements depend on effective implementation of reforms and policies. This isn't the first time in the past decade that India's GDP has risen from lows. This time around, though below potential, growth appears sustainable and qualitatively better as it is accompanied by prudent fiscal and monetary policies which are 'repair-and-reform' oriented. Thus, CRISIL Research estimates that India's GDP growth will be closer to 8% during fiscals 2017 to 2020.

The Indian economy has continued to consolidate the gains achieved in restoring macroeconomic stability. A sense of this turnaround is illustrated by a cross-country comparison. In last year's Survey, we had constructed an overall index of macroeconomic vulnerability, which adds a country's fiscal deficit, current account deficit, and inflation. This index showed that in 2012 India was the most vulnerable of the major emerging market countries. Subsequently, India has made the most dramatic strides in reducing its macro-vulnerability. Since 2013, its index has improved by 5.3 percentage points compared with 0.7 percentage point for China, 0.4 percentage point for all countries India's investment grade (BBB), and a deterioration of 1.9 percentage points in the case of Brazil. 1.28 If macro-economic stability is one key element of assessing a country's attractiveness to investors, its growth rate is another. In last year's Survey we had constructed a simple Rational Investor Ratings Index (RIRI) which combined two elements, growth serving as a gauge for rewards and the macro-economic vulnerability index proxying for risks. The RIRI is depicted ; higher levels indicate better performance. As can be seen, India performs well not only in terms of the change of the index but also in terms of the level, which compares favourably to its peers in the BBB investment grade and even its "betters" in the A grade. 1. As an investment proposition, India stands out internationally.

Overview of GDP Growth in India

India is one of the fastest-growing large economies worldwide. The Indian macroeconomic situation has improved appreciably in the recent years, with increased pace in economic expansion, moderation in retail inflation and narrowing of the current account and fiscal deficits. The pace of Indian GDP growth has recovered from a modest 5.6% in FY 2013 to 7.6% in FY 2016, led by fast-growing sectors such as industries with mixed trends across various states. (Source: ICRA Report)

Review of major developments in Indian economy

In the Advance Estimates of GDP that the Central Statistics Office (CSO) released recently, the growth rate of GDP at constant market prices is projected to increase to 7.6 per cent in 2015-16 from 7.2 per cent in 2014-15, mainly because private final consumption expenditure has accelerated. Similarly, the growth rate of GVA for 2015-16 is estimated at 7.3 per cent vis-à-vis 7.1 per cent in 2014-15. Although agriculture is likely to register low growth for the second year in a row on account of weak monsoons, it has performed better than last year. Industry has shown significant improvement primarily on account of the surprising acceleration in manufacturing (9.5 per cent vis-à-vis 5.5 per cent in 2014-15). Meanwhile, services continue to expand rapidly.

Even as real growth has been accelerating, nominal growth has been falling, to historically low levels, an unusual trend highlighted in the Mid-Year Economic Analysis (MYEA), 2015-16.

According to the Advance Estimates, nominal GDP (GVA) is likely to increase by just 8.6 (6.8) percent in 2015-16.

In nominal terms, construction is expected to stagnate, while even the dynamic sectors of trade and finance are projected to grow by only 7 to 7 3/4 percent.

Inflation remains under control The CPI-New Series inflation has fluctuated around 5 1/2 percent, while measures of underlying trends—core inflation, rural wage growth and minimum support price increases—have similarly remained muted. Meanwhile, the WPI has been in negative territory since November 2014, the result of the large falls in international commodity prices, especially oil. As low inflation has taken hold and confidence in price stability has improved, gold imports have largely stabilized, notwithstanding the end of a period of import controls.

Similarly, the external position appears robust. The current account deficit has declined and is at comfortable levels; foreign exchange reserves have risen to US\$351.5 billion in early February 2016, and are well above standard norms for reserve adequacy; net FDI inflows have grown from US\$21.9 billion in April-December 2014-15 to US\$27.7 billion in the same period of 2015-16; and the nominal value of the rupee, measured against a basket of currencies, has been steady. India was consequently well-positioned to absorb the volatility from the U.S. Federal Reserve actions to normalize

monetary policy that occurred in December 2015. Although the rupee has declined against the dollar, it has strengthened against the currencies of its other trading partners.

The fiscal sector registered three striking successes: ongoing fiscal consolidation, improved indirect tax collection efficiency; and an improvement in the quality of spending at all levels of government

Government tax revenues are expected to be higher than budgeted levels. Direct taxes grew by 10.7 per cent in the first 9 months (9M) of 2015-16. Indirect taxes were also buoyant. In part, this reflected excise taxes on diesel and petrol and an increase in the Swachh Bharat cess. The central excise duty collection from petroleum products during April to December 2015-16 recorded a growth of 90.5 per cent and stood at Rs. 1.3 lakh crore as against Rs. 0.7 lakh crore in the same period last year. Tax performance also reflected an improvement in tax administration because revenues increased even after stripping out the additional revenue measures (ARMs). Indirect tax revenues grew by 10.7 per cent (without ARMs) and 34.2 per cent (with ARMs).

The main findings are that a welcome shift in the quality of spending has occurred from revenue to investment, and towards social sectors. Aggregate public investment has increased by about 0.6 per cent of GDP in the first 8 months of this fiscal year, with contributions from both the Centre (54 per cent) and states (46 per cent).

Development in the Capital Market

Primary Market

In 2015-16 (April-December), resource mobilization through the public and right issues has surged rapidly as compared to the last financial year. During 2015-16 (April-December), 71 companies have accessed the capital market and raised R51,311 crore, compared to R11,581 crore raised through 61 issues during the corresponding period of 2014-15.

The small and medium enterprises (SME) platform of the stock exchange is intended for small and medium sized companies with high growth potential, whose post issue paid-up capital is less than or equal to R 25 crore. During 2015-16 (April-December), 32 companies were listed on the SME platform, raising a total amount of R278 crore as compared to R229 crore raised through 28 issues in the corresponding period of 2014-15. Resources mobilized by mutual funds during April-December 2015 also increased substantially to R1,61,696 crore from R87,942 crore mobilized during the same period of the previous year.

Secondary Market

During 2015-16 so far, the Indian securities market has remained subdued. The Bombay Stock Exchange (BSE) Sensex declined by 8.5 per cent (up to 5 January 2016) over end-March 2015, mainly on account of turmoil in global equity markets in August 2015 following slowdown in China and its currency devaluation and slump in stocks. On 4 January 2016, weak Chinese manufacturing data again led to a global sell-off which caused the BSE Sensex also to decline by 538 points. The downward trend in the Indian stock market was also guided by mixed corporate earnings for Q1 and Q2 of 2015-16, FPIs' concern over minimum alternative tax (MAT), weakening of the rupee against the US dollar, investor concern over delay in passage of the Goods and Services Tax Source: SEBI (GST) Bill, uncertainty over interest rate hike by US Fed and selling by FPIs. However, the Indian equity market has been relatively resilient during this period compared to the other major EMEs. The Indian stock market withstood the US Fed increase in interest rates in December 2015.

Industrial Performance

The Index of Industrial Production (IIP) which provides quick estimates of the performance of key industrial sectors have started showing upward momentum . As per IIP, the industrial sector broadly comprising mining, manufacturing and electricity attained 3.1 per cent growth during April-December 2015-16 as compared to 2.6 per cent during the same period of 2014- 15 due to the higher growth in mining and manufacturing sectors. The mining, manufacturing and electricity sectors grew by 2.3 per cent, 3.1 per cent, and 4.5 per cent respectively during April-December 2015-16. The mining sector growth was mainly on account of higher coal production. The manufacturing sector was propelled by the higher production by the industry groups like furniture; wearing apparel, dressing and dyeing of fur; motor vehicles, trailers & semitrailers; chemicals and chemical products; refined petroleum products & nuclear fuel and wood & products of wood. The growth in electricity is mainly contributed by higher growth in generation of thermal and nuclear sector.

In terms of use based classification, consumer durable goods have witnessed a remarkable growth at 12.4 per cent during April-December 2015-16. Basic goods and capital goods have registered 3.4 per cent and 1.7 per cent growth with intermediate goods by 1.9 per cent

The eight core infrastructure supportive industries, coal, crude oil, natural gas, refinery products, fertilizers, steel, cement and electricity that have a total weight of nearly 38 per cent in the IIP, registered a cumulative growth of 1.9 per cent during April-December 2015-16 as compared to 5.7 per cent during April-December 2014-15. Month-wise performance of the eight core sectors shows that the production of coal and fertilizers have increased substantially, while that of crude oil, natural gas and steel have mostly been negative. Refinery products, cement and electricity have attained moderate growth. Clearances for coal projects have facilitated production of coal. Crude oil and natural gas production declined because of a fall in production by Oil and Natural Gas Corporation (ONGC), Oil India Limited (OIL) and also private/joint venture (JV) companies in different months. In electricity generation, while the thermal and nuclear sectors have registered higher growth, the hydro sector has not performed well.

Figure 6.1 depicts three months moving average month-on-month (M-o-M) growth of the IIP, manufacturing and eight core industries. The growth in industrial production, manufacturing sector and the eight core sectors started picking up again in December 2015. It is expected that the uptick in growth rate will be maintained due to revival in manufacturing production

While the overall IIP has shown recovery, there is variation in the performance of some of the major industries during April-December 2015. While some sectors like electricity, coal, fertilizers, cement and passenger cars have shown positive growth, sectors like steel and aluminium have shown negative growth during April-December 2015

Micro Small and Medium Enterprises

With 3.6 crore units spread across the country, that employ 8.05 crore people, Micro, Small and Medium Enterprises (MSME) have a contribution of 37.5 per cent to the country's GDP. The sector has huge potential for helping address structural problems like unemployment, regional imbalances, unequal distribution of national income and wealth across the country. Due to comparatively low capital costs and their forward-backward linkages with other sectors, MSMEs will play a crucial role in the success of the Make in India initiative.

Realizing the importance of the MSME sector, the government has undertaken a number of schemes/programmes like the Prime Minister's Employment Generation Programme (PMEGP), Credit Guarantee Trust Fund for Micro and Small Enterprises (CGTMSE), Credit Linked Capital Subsidy Scheme (CLCSS) for Technology Upgradation, Scheme of Fund for Regeneration of Traditional Industries (SFURTI), and Micro and Small Enterprises Cluster Development Programme (MSECDP) for the establishment of new enterprises and development of existing ones. Some of the new initiatives undertaken by the government for the promotion and development of MSMEs, are as follows:

Udyog Aadhar Memorandum (UAM): The UAM scheme, which was notified in September 2015 under section 8 of the MSME Development Act 2006, is a pathbreaking step to promote ease of doing business for MSMEs. Under the scheme, MSME entrepreneurs just need to file an online entrepreneurs' memorandum to instantly get a unique Udyog Aadhaar

Number (UAN). The information sought is on self-certification basis and no supporting documents are required. This marks a significant improvement over the earlier complex and cumbersome procedure.

Employment Exchange for Industries: To facilitate match making between prospective job seekers and employers an employment exchange for industries was launched on June 15, 2015 in line with Digital India. More than 3.42 lakh job seekers have been registered on the portal as on December 30, 2015.

Framework for Revival and Rehabilitation of MSMEs: Under this framework, which was notified in May 2015, banks have to constitute a Committee for Distressed MSME enterprises at zonal or district level to prepare a Corrective Action Plan (CAP) for these units.

A scheme for Promoting Innovation and Rural Entrepreneurs (ASPIRE): ASPIRE was launched on March 16, 2015 with the objective of setting up a network of technology centers and incubation centers to accelerate entrepreneurship and promote start-ups for innovation and entrepreneurship in rural and agriculture-based industry.

In addition, the government intends to provide more credit to MSME sectors, especially in the rural areas, focusing on skill development, encouraging entrepreneurial activities with optimistic mindset among rural youth and creating job opportunities among rural women, for high, inclusive and sustained industrial growth.

Outlook for Growth

Real GDP growth for 2015-16 is expected to be in the 7 to 7³/₄ range, reflecting various and largely offsetting developments on the demand and supply sides of the Indian economy. Before analyzing these factors, however, it is important to step back and note one important point. India's long-run potential GDP growth is substantial, about 8-10 percent (Box 1.1). But its actual growth in the short run will also depend upon global growth and demand. After all, India's exports of manufactured goods and services now constitute about 18 percent of GDP, up from about 11 percent a decade ago

Reflecting India's growing globalization, the correlation between India's growth rate and that of the world has risen sharply to reasonably high levels. For the period 1991- 2002 this correlation was 0.2. Since then, the correlation has doubled to 0.42 (Figure 1). In other words, a 1 percentage point decrease in the world growth rate is now associated with a 0.42 percentage point decrease in Indian growth rates.

Accordingly, if the world economy remains weak, India's growth will face considerable headwinds. For example, if the world continues to grow at close to 3 percent over the next few years rather than returning to the buoyant 4-4¹/₂ per cent recorded during 2003-2011, India's medium-term growth trajectory could well remain closer to 7-7¹/₂ per cent, notwithstanding the government's reform initiatives, rather than rise to the 8-10 per cent that its long-run potentials suggests. In other words, in the current global environment, there needs to be a recalibration of growth expectations and consequently of the standards of assessment.

Turning to the outlook for 2016-17, we need to examine each of the components of aggregate demand: exports, consumption, private investment and government

To measure the demand for India's exports, we calculate a proxy-weighted average GDP growth rate of India's export partners. The weights are the shares of partner countries in India's exports of goods and services. We find that this proxy for export demand growth declined from 3.0 percent in 2014 to 2.7 per cent in 2015, which helps explain the deceleration in India's non-oil exports, although the severity of the slowdown—in fact, a decline in export volume—went beyond adverse external developments (Figure 8). Current projections by the IMF indicate that trading partner growth this demand will improve marginally this year to about 2.8 percent. But the considerable downside risks suggest that it would be prudent not to count on a big contribution to GDP growth from improving export performance.

On the domestic side, two factors could boost consumption. If and to the extent the Seventh Pay Commission (7th PC) is implemented, increased spending from higher wages and allowances of government workers will start flowing through the economy. If, in addition, the monsoon returns to normal, agricultural incomes will improve (see Box 1.5), with attendant gains for rural consumption, which over the past two years of weak rains has remained depressed.

Against this, the disappearance of much of last year's oil windfall would work to reduce consumption growth. Current prospects suggest that oil prices (Indian crude basket) might average US\$ 35 per barrel next fiscal year compared with US\$ 45 per barrel in 2015-16. The resulting income gain would amount roughly equivalent to 1 percentage point of GDP – an 18 per cent price decline times a share of net oil imports in GDP of 6 percent. But this would be half the size of last year's gain, so consumption growth would slow on this account next year.

According to analysis done by Credit Suisse, (non-financial) corporate sector profitability has remained weak, falling by 1 percent in the year to December 2015.² This decline reflected a sharp deterioration in the financial health of the metals – primarily steel – companies, which have now joined the ranks of companies under severe financial stress. As a result, the proportion of corporate debt owed by stressed companies, defined as those whose earnings are insufficient to cover their interest obligations, has increased to 41 percent in December 2015, compared to 35 percent in December 2014.³ In response to this stress, companies have once again been compelled to curb their capital expenditures substantially.

Finally, the path for fiscal consolidation will determine the demand for domestic output from government. The magnitude of the drag on demand and output will be largely equal to the size of consolidation, assuming a multiplier of about 1.

There are three significant downside risks. Turmoil in the global economy could worsen the outlook for exports and tighter financial conditions significantly. Second, if contrary to expectations oil prices rise more than anticipated, this would increase the drag from consumption, both directly, and owing to reduced prospects for monetary easing. Finally, the most serious risk is a combination of the above two factors. This could arise if oil markets are dominated by supply-related factors such as agreements to restrict output by the major producers.

The one significant upside possibility is a good monsoon. This would increase rural consumption and, to the extent that it dampens price pressures, open up further space for monetary easing

Putting these factors together, we expect real GDP growth to be in the 7 to 7 3/4 per cent range, with downside risks because of ongoing developments in the world economy. The wider range in the forecast this time reflects the range of possibilities for exogenous developments, from a rebound in agriculture to a full-fledged international crisis; it also reflects uncertainty arising from the divergence between growth in nominal and real aggregates of economic activity.

Growth Trends in India

In FY 2016, the growth of India's GDP and gross value added ("GVA") at basic prices rose to 7.6% and 7.2%, respectively, from 7.2% and 7.1%, respectively, in FY 2015. Subsequently, the growth of India's GDP (at constant FY 2012 prices) moderated to 7.1% in Q1 FY 2017 in year-on-year ("YoY") terms from 7.5% in Q1 FY 2016.

The table below sets forth the growth in India's real GDP per certain component in percentage terms (at constant FY 2012 prices, YoY):

GDP	7.5	7.6	7.2	7.9	7.1	7.2	7.6

The slowdown in Q1 FY 2017 was led by the contraction in gross fixed capital formation ("GFCF") in Q1 FY2017, which reflects the de-growth in the output of capital goods and the capital expenditure of the government of India (the "Government") in Q1 FY 2017, as well as the sluggish investment activity by the private sector.

Additionally, the growth of private final consumption expenditure ("PFCE") eased in Q1 FY 2017. In contrast, the government final consumption expenditure ("GFCE") expanded by 18.8% in Q1 FY 2017 on account of 27.9% growth of the Government's non-interest revenue expenditure, a turnaround relative to the contraction of 0.2% in Q1 FY 2016. Additionally, the increase in exports and contraction of imports in Q1 FY 2017 further curtailed the drag exerted on the pace of GDP expansion. (Source: ICRA Report)

The table below sets forth the growth in India's real GDP per sector in percentage terms (at constant FY 2012 prices, YoY):

Components	Q1 FY 2016	Q2 FY 2016	Q3 FY 2016	Q4 FY 2016	Q1 FY 2017	FY 2015	FY 2016
Agriculture, Forestry & Fishing	2.6	2.0	(1.0)	2.3	1.8	(0.2)	1.2
Industry	6.7	6.3	8.6	7.9	6.0	5.9	7.4

GVA ex-Agri	8.0	8.1	8.9	8.4	8.2	8.6	8.3

The growth of GVA at basic prices on YoY basis rose to 7.3% in Q1 FY 2017 from 7.2% in Q1 FY 2016, which was led by a pickup in growth in services to 9.6% from 8.8%, despite drop in growth in industry (to +6.0% from +6.7%) and agriculture, forestry and fishing (to +1.8% from +2.6%). The rise in service sector growth in Q1 FY 2017 compared to Q1 FY 2016 was led by the sharp growth in public administration, defense and other services and a marginal increase in growth of financial, real estate and professional services, which offset the correction in growth of trade, hotels, transport, communication and services related to broadcasting. The drop in industry sector growth was due to poor performance of mining and quarrying and construction, despite an uptick in growth of manufacturing and electricity, gas, water supply and other utility services. Growth Trends among the States in India

Based on the early estimates for FY 2016, the following 8 states are expected to display growth greater than 8%: Andhra Pradesh, Arunachal Pradesh, Jharkhand, Madhya Pradesh, Meghalaya, Tamil Nadu, Telangana and Uttarakhand. India Increasing Importance to Global Growth

Despite global headwinds and a truant monsoon, India registered robust growth of 7.2 per cent in 2014-15 and 7.6 per cent in 2015-16, thus becoming the fastest growing major economy in the world. As per the estimates of the International Monetary Fund (IMF), global growth averaged 3.1 per cent in 2015, declining from 3.4 per cent registered in 2014. While growth in advanced economies has improved modestly since 2013, the emerging economies have witnessed a consistently declining trend in growth rate since 2010. It is against this background that the recent Indian growth story appears particularly bright.

India has made striking progress in its contribution to the global growth of Gross Domestic Product (GDP) in Purchasing Power Parity (PPP) terms. PPP represents the number of units of a country's currency required to purchase the same amount of goods and services in the domestic market as the US dollar would purchase in the United States, thus adjusting for purchasing power differentials between currencies in relevant markets. India's contribution to global growth in PPP terms increased from an average of 8.3 per cent during the period 2001 to 2007 to 14.4 per cent in 2014. During the 1990s, the US's contribution to the global GDP growth in PPP terms was, on an average, around 16 percentage points higher than India's. The picture changed dramatically in 2013 and 2014 when India's contribution was higher than that of the US by 2.2 and 2.7 percentage points respectively. During 1991-2014, low growth in Japan (0.9 per cent annually) resulted in its low contribution (1.5 per cent) to global growth. India and China constitute 42.5 per cent and 53.2 per cent respectively of the total PPP measure of the lower-middle income countries and upper-middle income countries; and hence those country groups largely reflect India's and China's patterns

The global economy—in particular the global growth powerhouse, China—is rebalancing, leading to an increasing role for India. After the onset of the multiple crises in different parts of the world, India's contribution has become much more valuable to the global economy

India's share in world GDP has increased from an average of 4.8 per cent during 2001-07 to 6.1 per cent during 2008-13 and further to an average of 7.0 per cent during 2014 to 2015 in current PPP terms (IMF). India's resilience and current levels of reasonably strong growth should, thus, be appreciated in the light of its increasing contribution to global growth.

INDIAN TRADING INDUSTRY

Introduction

The Prime Minister of India, Mr Narendra Modi, has launched the 'Make in India' initiative to place India on the world map as a manufacturing hub and give global recognition to the Indian economy.

The Government of India has set an ambitious target of increasing the contribution of manufacturing output to 25 per cent of Gross Domestic Product (GDP) by 2025, from 16 per cent currently.

Market Size

India's manufacturing sector could touch US\$ 1 trillion by 2025. There is potential for the sector to account for 25-30 per cent of the country's GDP and create up to 90 million domestic jobs by 2025.

Business conditions in the Indian manufacturing sector continue to remain positive.

In November 2015, the seasonally adjusted Nikkei India Manufacturing Purchasing Managers' Index (PMI) stood at 50.3, which indicated expansion for twenty-fifth consecutive month. The services PMI was at 50.1 points in November 2015.

Growth Drivers

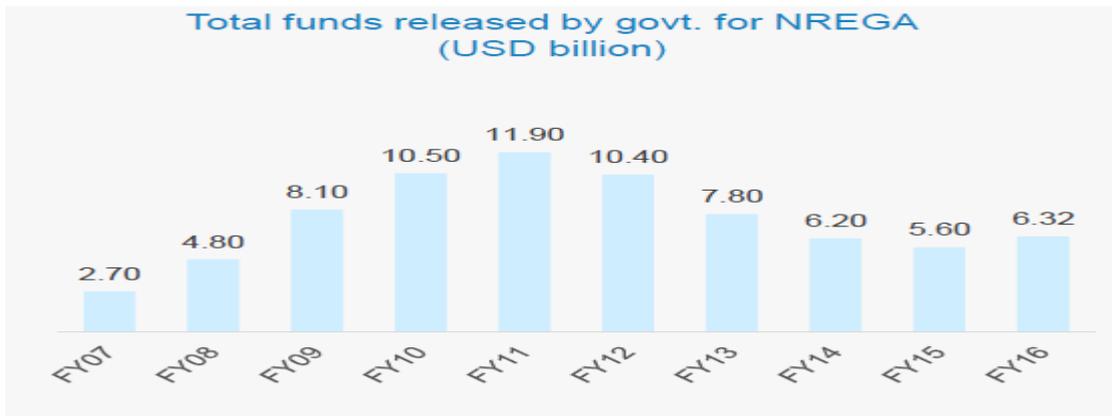

Higher Income Aid Growth in Urban and Rural Market

- Incomes have risen at a brisk pace in India and will continue rising given the country's strong economic growth prospects. According to IMF, nominal per capita income is estimated to grow at a CAGR of 4.94% during 2010-19F.
- An important consequence of rising incomes is growing appetite for premium products, primarily in the urban segment.
- As the proportion of 'working age population' in total population increases, per capita income and GDP are expected to surge.
- Per capita income in India is expected to grow at a CAGR of 8.09% during 2015-19F.

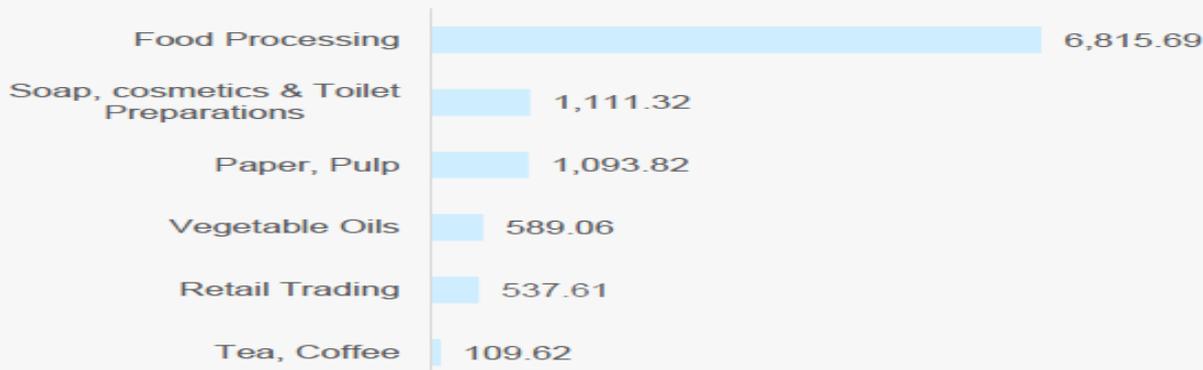

Government Initiatives

- The Indian government has been supporting the rural population with higher MSPs, loan waivers, and disbursements through the NREGA programme. These schemes have empowered the rural masses and increased their purchasing power, thus boosting FMCG consumption.
- During FY07-16, allocation of funds to NREGA increased at a CAGR of 9.91%, with the total funds released by the government for NREGA reaching to USD 6.32 billion by FY16.
- The government's focus on rural markets is also encouraging many FMCG companies, such as HUL, Dabur, and ITC, to expand their rural network and increase product penetration.
- These measures have helped in reducing poverty in rural India and have thus propped up rural purchasing power.
- Government has taken initiatives like Pradhan Mantri Jan Dhan Yojana through which wage seekers are encouraged to open up bank accounts under Mahatma Gandhi National Rural Employee Guarantee Act.
- Under the upcoming Budget Scheme 2017-18, the government is likely to retain its focus on rural economy by continuing the pro-poor and pro-farmer schemes.

Overview of Plastic Industry

Introduction

The Indian plastics industry made a promising beginning in 1957 with the production of polystyrene. Thereafter, significant progress has been made, and the industry has grown and diversified rapidly. The industry spans the country and hosts more than 2,000 exporters. It employs about 4 million people and comprises more than 30,000 processing units, 85-90 percent of which are small and medium-sized enterprises.

- Export of plastic products from India stood at US\$ 7.64 billion in FY 2015-16.
- During 2015-16, major importers of Indian plastic products were US (US\$ 898.45 million), China (US\$ 489.25 million), UAE (US\$ 422.74 million), Germany (US\$ 290.03 million), UK (US\$ 287.68 million), Italy (US\$ 286.9 million), Turkey (US\$ 285.23 million), Bangladesh (US\$ 184.33 million), Saudi Arabia (US\$ 169.1 million) and Nepal (US\$ 161.09 million)
- Domestic consumption of plastic is expected to touch 20 million Metric Tonnes by 2020.
- The Indian plastics industry produces and exports a wide range of raw materials, plastic-moulded extruded goods, polyester films, moulded / soft luggage items, writing instruments, plastic woven sacks and bags,

polyvinyl chloride (PVC), leather cloth and sheeting, packaging, consumer goods, sanitary fittings, electrical accessories, laboratory / medical surgical ware, tarpaulins, laminates, fishnets, travelware, and others.

- The Indian plastics industry offers excellent potential in terms of capacity, infrastructure and skilled manpower. It is supported by a large number of polymer producers, and plastic process machinery and mould manufacturers in the country.

PLASTICS EXPORT PROMOTION COUNCIL

The Plastics Export Promotion Council (PLEXCONCIL) is the apex government body responsible for the promotion of plastic exports. PLEXCONCIL members comprise large-/medium-/small-scale manufacturers and exporters. The council supports exporters by participating in international trade fairs, exploring new markets, organising buyer- seller meets both in India and overseas, and engaging in various other promotion and need- based activities.

Total export of plastic products stood at US\$ 7.64 billion in FY 2015-16

Plastic products	Extrusion	Films and Sheets, Fibre and Filaments Pipes, Conduits and profiles, Miscellaneous applications
	Injection moulding	Industrial Injection Moulding, Household Injection Moulding and Thermoware/ Moulded luggage
	Blow moulding	Bottles, containers, Toys and Housewares

Indian Plastic Industry

Plastics are one of the fastest growing industries in India. Products made out of various types of plastics play an indispensable role in a number of industries such as agriculture, packaging, construction, consumer and institutional products, power, furniture and furnishings, electrical and electronic components, telecommunication, and others. The following table illustrates some of the common uses of plastics in industries:

Industry	Application
Agriculture	Crates, irrigation pipes, tubes, greenhouses
Power	Insulation wires, switches, plugs
Automobiles	Vehicle body parts such as fenders, body panels, etc
Construction	Doors, windows, frames, railings, floorings, sidings, beams, bricks
Pharmaceuticals	Petri-dishes, beakers, bottles, optical lenses, dentistry, etc.
Consumer Products	Tables, chairs, cabinets, bins, mats, vessels, utensils, etc
Industrial Products	Paints, tools, items of machinery, etc.
Packaging	Pouches, barrels, bottles, bags, boxes, crates
Telecommunication	Cables, handsets, shelters, etc.
Hospitality	Cutlery, tools, sanitaryware, toiletries
Textiles	Synthetic fabrics, yarns, fibres, etc.

There are four key techniques for manufacturing plastic products: extrusion, injection moulding, rotomoulding and blow moulding. The following table lays down an illustrative list of products that can be manufactured using each of said processes

Plastic Products	Extrusion	Films, sheets, fibre & filaments pipes, conduits & profiles, miscellaneous applications
	Injection moulding	Furniture, crates, industrial products such as pallets, etc.;
	Blow moulding	Bottles, containers, toys & houseware
	Rotomoulding	Large circular tanks such as water tanks

Plastics can be broadly divided into thermosetting plastics and thermoplastics. Thermosetting plastics are those that cannot be softened again, once having been exposed to heat and pressure. Thermosets are hard and durable, and are mainly used for auto parts, aircraft parts and tires. Examples include polyurethanes, polyesters, epoxy resins and phenolic resins. Thermoplastics on the other hand are those which soften and melt if enough heat is applied; examples are polyethylene (PE), polypropylene (PP), polystyrene (PS), polyvinyl chloride (PVC) and polytetrafluoroethylene (PTFE)

Size of the Industry

The Indian plastic industry is highly fragmented comprising of more than 25,000 units. Barring 10 - 15% of the firms, a majority of the plastic processing units in India belongs to the small scale sector. The top 100 players account for just 20% of the total industry turnover. (source: CIPET, "Plastic Industry Statistics"). The plastic industry is fairly labour intensive, and provides employment to approximately 3.3 million people. The Planning Commission expects that the plastic industry would generate 3.7 million new jobs by FY 2012. The following table lays down a snapshot of the plastics industry as at the beginning of the 11th Five Year Plan (2008-12):

	Unit	
Major Raw Material Producers	Nos.	15
Processing Units	Nos.	22,000
Number of Machines	Nos.	65,484
Processing Industry Turnover	Rs. Crore	55,000
Polymer Industry capital Asset	Rs. Crore	85,000
Plastic Raw Material Production	MMT	4.9
Employment Direct/ Indirect	Million Nos.	3.3
Value of Exports	USD Billion	1.9
Revenue to Government	Rs. Crore	7,300

The vast opportunity offered by the industry has motivated Indian manufacturers to acquire technical expertise, adopt superior quality standards and build capacities in different facets of the plastic industry. Technological advancements in the global plastic machinery sector along with significant capacity expansion taking place in the petrochemical sector, has greatly facilitated the expansion of plastic processors in India. India has fairly low per capita consumption of plastic - around 5 kgs - as compared to the developed economies. The Planning Commission estimates that the per capita consumption of plastics in India would increase to 8.5 kgs by 2010. The following table shows global per capita consumption of plastic among key regions in the world:

Region	In kgs.							
	World Average	North America	Western Europe	Eastern Europe	China	India	S/E Asia	Latin America
Consumption	26	90	65	10	12	5	10	18

Exports of plastic & linoleum products have also been showing an increasing trend in India, registering a CAGR of 18.18% from \$1,752.7 Million in FY2004 to \$3,418.6 Million in FY2008, as illustrated in the table below:

Particulars	FY 2004	FY 2005	FY 2006	FY 2007	FY 2008
Plastic and Linoleum Products	1,752.7	3,032.8	2,819.3	3,252.6 ^{RE}	3,418.6 ^{PE}

Given the use of plastics in a number of key industries in the economy, the growth of the plastic industry is closely linked to the overall economic growth – traditionally, the growth rate in the plastic industry has been roughly 1.5 to 2 times the rate of growth of the economy. The Planning Commission estimates that investment in the plastics sector would reach \$2.5 billion (Rs. 10,790 crore) by 2011. With significant growth being estimated for several of the industries that use plastic, the plastic industry in India is expected to register considerable growth in the coming years.

- We are leading trader of EXIM SCRIPS all over India.
- The replenishment licenses were replaced by a new instrument called EXIM scrip. EXIM scrips were to be the means of obtaining access to certain categories of imports of raw materials, components and spares. They were issued on the basis of value of exports of foreign exchange (NFE) earnings from exports.
- The basic rate at which EXIM scrips were issued was 30% of f.o.b. value except for certain products such as gems and jewelry, handicraft, newspapers as also certain value added agricultural products, electronics and imported products etc. which were entitled to an additional 10 percentage points. EXIM scrips were to be freely tradable and were to be issued only after exports proceeds had been realised.
- Since June, 1991, the Government has initiated a series of trade policy changes with a view to integrating the Indian economy better with the rest of the world. The value of the rupee was adjusted downward by about 20 percent in July, 1991. This was followed by a liberalization of the foreign trade regime through some reduction in the quantitative restrictions. The import policy regime was revamped by shifting a significant number of items outside the purview of import licensing. Exporters were given entitlements equal to 30 to 40 percent of their export earnings in the form of EXIM Scrips against which even restricted items were allowed to be imported. Alongwith these, the Government dispensed with a number of export-incentives including the cash compensatory support to exports. As a first step towards a gradual reduction in the tariffs, the Union Budget for 1991-92 reduced the maximum rate of import duty from more than 300 percent to 150 percent.

They were issued on the basis of value of exports of foreign exchange (NFE) earnings from exports.
- The basic rate at which EXIM scrip's were issued was 30% of f.o.b. value except for certain products such as gems and jewelry, handicraft, newspapers as also certain value added agricultural products, electronics and imported products etc. which were entitled to an additional 10 percentage points. EXIM scrip's were to be freely tradable and were to be issued only after exports proceeds had been realized.
- Since June, 1991, the Government has initiated a series of trade policy changes with a view to integrating the Indian economy better with the rest of the world. The value of the rupee was adjusted downward by about 20 percent in July, 1991. This was followed by a liberalization of the foreign trade regime through some reduction in the quantitative restrictions. The import policy regime was revamped by shifting a significant number of items outside the purview of import licensing. Exporters were given entitlements equal to 30 to 40 percent of their export earnings in the form of EXIM Scrip's against which even restricted items were allowed to be imported. Alongwith these, the Government dispensed with a number of export-incentives including the cash

compensatory support to exports. As a first step towards a gradual reduction in the tariffs, the Union Budget for 1991-92 reduced the maximum rate of import duty from more than 300 percent to 150 percent.

1500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., M 22.00 in the above example. The Issuer, in consultation with the BRLMs, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below M 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

e) Alternate Method of Book Building

In case of FPOs, Issuers may opt for an alternate method of Book Building in which only the Floor Price is specified for the purposes of Bidding (“Alternate Book Building Process”).

The Issuer may specify the Floor Price in the RHP/ Prospectus or advertise the Floor Price at least one Working Day prior to the Bid/ Issue Opening Date. QIBs may Bid at a price higher than the Floor Price and the Allotment to the QIBs is made on a price priority basis. The Bidder with the highest Bid Amount is allotted the number of Equity Shares Bid for and then the second highest Bidder is allotted Equity Shares and this process continues until all the Equity Shares have been allotted. RIIs, NIIs and Employees are Allotted Equity Shares at the Floor Price and Allotment to these categories of Bidders is made proportionately. If the number of Equity Shares Bid for at a price is more than available quantity then the Allotment may be done on a proportionate basis. Further, the Issuer may place a cap either in terms of number of specified securities or percentage of issued capital of the Issuer that may be Allotted to a single Bidder, decide whether a Bidder be allowed to revise the bid upwards or downwards in terms of price and/or quantity and also decide whether a Bidder be allowed single or multiple bids.

SECTION 6: ISSUE PROCEDURE IN FIXED PRICE ISSUE

Applicants may note that there is no Bid cum Application Form in a Fixed Price Issue. As the Issue Price is mentioned in the Fixed Price Issue therefore on filing of the Prospectus with the RoC, the Application so submitted is considered as the Application Form.

The Allotment to the RIIs will then be made in the following manner:

a) In the event the number of RIIs who have submitted valid Bids in the Issue is equal to or less than Maximum RII Allotment, (i) all such RIIs shall be Allotted the minimum Bid Lot; and (ii) the balance available Equity Shares, if any, remaining in the Retail Category shall be Allotted on a proportionate basis to the RIIs who have received Allotment as per (i) above for the balance demand of the Equity Shares Bid by them (i.e. who have Bid for more than the minimum Bid Lot).

b) In the event the number of RIIs who have submitted valid Bids in the Issue is more than Maximum RII Allotment, the RIIs (in that category) who will then be Allotted minimum Bid Lot shall be determined on the basis of draw of lots.

7.2 ALLOTMENT TO NIIs

Bids received from NIIs at or above the Issue Price may be grouped together to determine the total demand under this category. The Allotment to all successful NIIs may be made at or above the Issue Price. 7.5 BASIS OF ALLOTMENT FOR QIBs (OTHER THAN ANCHOR INVESTORS), NIIs AND RESERVED CATEGORY IN CASE OF OVER-SUBSCRIBED ISSUE

In the event of the Issue being over-subscribed, the Issuer may finalize the Basis of Allotment in consultation with the Designated Stock Exchange in accordance with the SEBI ICDR Regulations, 2009.

The allocation may be made in marketable lots, on a proportionate basis as explained below:

- a) Bidders may be categorized according to the number of Equity Shares applied for;
- b) The total number of Equity Shares to be Allotted to each category as a whole may be arrived at on a proportionate basis, which is the total number of Equity Shares applied for in that category (number of Bidders in the category multiplied by the number of Equity Shares applied for) multiplied by the inverse of the over-subscription ratio;
- c) The number of Equity Shares to be Allotted to the successful Bidders may be arrived at on a proportionate basis, which is total number of Equity Shares applied for by each Bidder in that category multiplied by the inverse of the over-subscription ratio;
- d) In all Bids where the proportionate Allotment is less than the minimum Bid Lot decided per Bidder, the Allotment may be made as follows: the successful Bidders out of the total Bidders for a category may be determined by a draw of lots in a manner such that the total number of Equity Shares Allotted in that category is equal to the number of Equity Shares calculated in accordance with (b) above; and each successful Bidder may be Allotted a minimum of such Equity Shares equal to the minimum Bid Lot finalized by the Issuer;
- e) If the proportionate Allotment to a Bidder is a number that is more than the minimum Bid lot but is not a multiple of one (which is the marketable lot), the decimal may be rounded off to the higher whole number if that decimal is 0.5 or higher. If that number is lower than 0.5 it may be rounded off to the lower whole number. Allotment to all Bidders in such categories may be arrived at after such rounding off; and
- f) If the Equity Shares allocated on a proportionate basis to any category are more than the Equity Shares Allotted to the Bidders in that category, the remaining Equity Shares available for Allotment may be first adjusted against any other category, where the Allotted Equity Shares are not sufficient for proportionate Allotment to the successful Bidders in that category.
